

Deimonas Suchanka

Technical Systems Engineer

The Hague, NL · EU Citizen · ds.suchanka@gmail.com · github.com/Sorbieskis

Engineer with hands-on experience in systematic testing, calibration, and root cause analysis of complex electromechanical systems. Proven ability to diagnose production issues using data-driven methods and deliver quantifiable improvements. Ex-NATO military background with shift work capability.

PROFESSIONAL EXPERIENCE

Ventil Test Equipment BV

Service Engineer (Technical Systems)

Den Haag, Netherlands

Dec 2024 – Present

- **Root Cause Analysis:** Led systematic investigation of critical production system instability. Deployed sensors, performed time-series analysis, and retuned PID parameters to achieve +350% force consistency improvement.
- **Technical Verification:** Served as interim Systems Engineer, auditing P&ID schematics against Bill of Materials (BOM) and identifying design discrepancies prior to assembly.
- **System Qualification:** Performed commissioning, testing, and validation of high-pressure systems (up to 1000 bar) for aerospace and industrial applications.
- **Process Improvement:** Diagnosed chronic lubrication failures in submerged spindle applications; researched tribology requirements and sourced replacement grease now adopted as standard.
- **Internal Tooling:** Developed automation platform (Python/Django) to streamline documentation workflows, eliminating formatting errors.

Fast & Fluid Management

Assembly Technician (Mechatronics)

Sassenheim, Netherlands

May 2024 – Oct 2024

- Assembly and functional testing of precision dispensing systems.
- Executed electrical/mechanical troubleshooting on non-conforming units prior to QC release.

Lithuanian Armed Forces (NATO)

Designated Marksman (Infantry)

Lithuania

2020 – 2021

- **Precision Operations:** Responsible for zeroing and preventative maintenance of precision optics and weaponry systems.
- **CBRN Trained:** Completed specialized training for operations in Chemical, Biological, Radiological, and Nuclear environments (Hazmat protocols).
- Demonstrated ability to maintain focus and strict adherence to Rules of Engagement during 24+ hour sustained operations.

CERTIFICATIONS & CLEARANCES

- **Security Clearance:** Eligible for NATO Secret / NL VGB (EU/NATO Citizen, Veteran).
- **Safety:** VOL-VCA (Safety for Operational Supervisors).

TECHNICAL COMPETENCIES

Testing & Calibration	High-pressure hydraulics (1000 bar), Sensor instrumentation, PID Tuning, System Calibration, Performance validation.
Troubleshooting	Root Cause Analysis (RCA), P&ID/Schematic Verification, Data-driven diagnostics.
Operational	Night/shift work capability, ISO 9001 Compliance, Technical Writing, Process improvement.

EDUCATION

University of Amsterdam — Coursework toward BA, European Studies
High School Diploma

2022 – 2023
2019

Control Loop Optimization & RCA

APPENDIX: Pekos Clamping System

+350% Improvement in Force Consistency

Applied data-driven engineering to stabilize a critical production asset.

- **Problem:** Production unit suffered from unpredictable force deviations, leading to failed safety tests.
- **Methodology:** Instrumented the machine with digital pressure transducers and logged high-frequency data to visualize hysteresis and pressure drift.
- **Analysis:** Identified PID control instability in the hydraulic logic using Python data visualization.
- **Resolution:** Recalibrated system parameters and authored a new Standard Operating Procedure (SOP) for operators.

Digital Transformation

APPENDIX: Project Unidoc

Enterprise Documentation Infrastructure

Full-cycle development of internal tooling to replace legacy manual workflows.

- **Problem:** Engineering team faced significant bottlenecks manually formatting documentation in Word, leading to version control errors and production delays.
- **Solution:** Designed and deployed an internal CMS platform (Django/Wagtail) with automated PDF generation to streamline technical documentation workflows.
- **Scope:** Solo developer, 18,000 lines of Python. Built modular content system for technical manuals.
- **Deployment:** Configured Windows Server/IIS production environment with automated testing suite.
